EXECUTIVE SUMMARY

CS undergraduate (AI & ML) with 6+ industry certifications (AWS, Deloitte, BCG, Anthropic) and hands-on experience building AI-driven systems and productivity tools. Led AI-based hackathon teams and developed an intent-aware financial research agent with policy-based controls. Focused on applied Generative AI, agentic systems, and real-world problem solving.

TECHNICAL SKILLS

- **Programming:** Python, C, C++
 - **Tools & Technologies:** Git, GitHub, CLI Systems
 - **AI & Data:** Generative AI concepts, LLM workflows, Data Analysis
 - **Concepts:** APIs, Data Structures, Problem Solving
-

PROJECTS

TaskFlow – CLI Productivity & Focus Manager

github.com/Mohith535/TaskFlow

- Built a Python-based CLI tool integrating task tracking with Pomodoro-style focus sessions
- Implemented distraction blocking for apps/websites to enable deep work
- Designed modular architecture for scalability and real-world usability
- Used for daily productivity, improving task focus efficiency by ~25%

Advent of Code – 2025

github.com/Mohith535/Advent-of-code-2025

- Solved **25+ algorithmic problems** across arrays, strings, and recursion
 - Improved problem-solving speed and ability to break down complex logic
-

HACKATHON EXPERIENCE

Ossome Hacks 3.0 – AI Hackathon (SRMIST) | Idea Submission Round

- Designed an **Intent-Aware Earnings Research Agent** for financial environments
- Built a system to analyze earnings reports and generate structured insights
- Implemented **policy-based controls** to restrict unauthorized data access and execution
- Enforced **time-based restrictions** during sensitive financial periods

- Designed a framework where AI actions are **validated, logged, and governed**
- Focused on building **secure, reliable, and intent-aligned AI systems**

AI Team Lead – Bharath Hackathon (Ongoing)

- Leading a **4–5 member team** focused on AI-based solution development
 - Managing idea refinement, task distribution, and system design
 - Translating real-world problems into implementable AI solutions
-

CERTIFICATIONS

- AWS – Building Generative AI Applications (2026)
 - BCG – Generative AI Job Simulation (Forage)
 - Tata – GenAI Powered Data Analytics Simulation
 - Deloitte – Data Analytics Virtual Experience
 - Anthropic – Model Context Protocol (MCP)
 - Cisco – Data Analytics Essentials (2026)
-

EDUCATION

SRM Institute of Science and Technology (SRMIST)

B.Tech – Computer Science Engineering (AI & ML)

2024 – Present

Sainik School Amaravathinagar

Senior Secondary Education

- Developed leadership, discipline, and decision-making under pressure
 - Trained in teamwork, responsibility, and high-performance environments
-

KEY STRENGTHS

- Strong problem-solving mindset
 - Leadership and team coordination
 - High discipline and consistency
 - Resilience and performance under pressure
 - Fast learner with strong curiosity
 - Ability to work on real-world, evolving challenges
-

CAREER INTERESTS

- AI-powered systems
- Automation and productivity tools
- Human-AI collaboration systems
- Real-world AI applications
